1. Identification

1.1. Product identifier

Trade name

TAPEH-75-AL1

1.2. Recommended use of the chemical and restrictions on use

Relevant applications identified

polymerization initiator

1.3. Details of the supplier of the safety data sheet

Company

United Initiators, Inc.
555 Garden Street
Elyria, OH 44035
USA

Telephone

440-323-3112

Telefax

440-323-2659

Email address

Cs-initiators.nafta@united-in.com

1.4. 24 HOUR EMERGENCY TELEPHONE NUMBERS:

CHEMTREC - US & CANADA:

800-424-9300

CHEMTREC INTERNATIONAL:

+1 703-527-3887 (collect calls accepted)

Product Regulatory Services:

973-929-8060

2. Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation 29CFR 1910.1200

<table>
<thead>
<tr>
<th>Category</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flammable liquids</td>
<td>3</td>
<td>H226</td>

</table>
2.3. Other hazards

None known

3. Composition/information on ingredients

- tert-Amyl peroxy-2-ethylhexanoate 75%
  - CAS-No.: 686-31-7
  - Organic peroxides Type D
  - Skin Sensitisation Category 1
  - Acute aquatic toxicity Category 1
  - Chronic aquatic toxicity Category 1
  - Contains one or both of the following isoparaffinic hydrocarbons <= 25%
  - Naphtha (petroleum), hydrotreated heavy
    - CAS-No.: 64742-48-9
    - Flammable liquids Category 4
    - Aspiration hazard Category 1
  - Alkanes, C10-13-iso-
    - CAS-No.: 68551-17-7
4. First aid measures

4.1. Description of first aid measures

General advice
Take off contaminated clothing immediately.
Never give anything by mouth to an unconscious person.
Remove from exposure, lie down.
If feeling unwell seek medical advice.

Inhalation
If inhaled remove to fresh air. If cough or other symptoms develops or persists get medical attention.

Skin contact
Wash off with soap and water.
Get medical attention if irritation develops and persists.

Eye contact
Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

Ingestion
If swallowed, call a poison control centre or doctor immediately.
DO NOT induce vomiting unless directed to do so by a physician or poison control center.
Never give anything by mouth to an unconscious person.
Should vomiting occur, be sure to keep victim’s head below hips to avoid aspiration of vomitus into the lungs.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms
None known

4.3. Indication of any immediate medical attention and special treatment needed
None known

5. Fire-fighting measures

5.1. Extinguishing media

Suitable extinguishing media: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media: High volume water jet.

5.2. Special hazards arising from the substance or mixture

Contact with incompatible materials or exposure to temperatures exceeding the SADT may result in a self acceleration decomposition reaction with release of flammable vapors which may autoignite.
Cool closed containers exposed to fire with water spray.
Containers exposed to temperatures exceeding the SADT (see section 10) may explode.
Vapors can travel to a source of ignition and flash back.
Do not allow run-off from fire fighting to enter drains or water courses.

5.3. Advice for firefighters
Evacuate area and fight fire from a safe distance.
Containers near the source of fire should be cooled with a water spray to prevent contents from reaching decomposition temperature. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. As in any fire, wear self-contained positive-pressure breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Evacuate personnel to safe areas. Wear a self-contained breathing apparatus and appropriate personal protective equipment. (See Section 8 - Exposure Controls/Personal Protection.) Remove all sources of ignition. Ventilate the area.

6.2. Environmental precautions
Obey relevant local, state, provincial and federal laws and regulations. Do not contaminate any lakes, streams, rivers, groundwater or soil.

6.3. Methods and material for containment and cleaning up
Organic Peroxide spills should be attended to immediately. Contain spill and absorb with an inert absorbent material and then wet down the mixture with water. Sweep up mixture of spilled organic peroxide and inert absorbent material using non-sparking tools and place in polyethylene bags for disposal. The sweepings in the polyethylene bag should be further wetted with water and disposed of immediately by an approved disposal company. KEEP WASTE REFRIGERATED - THERMALLY UNSTABLE. After all the material has been picked up, wash down the spill area with surfactant and water to remove any traces of organic peroxide. Allow for sufficient ventilation to aid in the removal of fumes that may be present.

Additional advice
Never return spills in original containers for re-use. Dispose of contaminated material as waste in accordance with section 13.

7. Handling and storage

7.1. Precautions for safe handling
REFRIGERATION REQUIRED Keep away from heat. Keep away from sparks, flames and other sources of ignition. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use with adequate ventilation. The need for grounding and bonding of containers in accordance with OSHA 29 CFR 1910.106 and NFPA 77 should be assessed for all product transfers. Follow all MSDS/label precautions even after the container is emptied because it may retain product residues. Wash thoroughly after handling. Do not swallow product. Use personal protective equipment. Protect from contamination. Dispense and transfer in an area separate from storage area. Never return unused material to storage receptacle. Wash contact areas after handling. Remove contaminated clothing and wash before reuse. The addition of accelerators may result in vigorous decomposition.

7.2. Conditions for safe storage, including any incompatibilities
Advice on protection against fire and explosion
Containers exposed to temperatures exceeding the SADT (see section 10) may decompose violently. Consult with specialists to ensure design protects against these hazards.

Storage
REFRIGERATION REQUIRED
Heat or contamination may cause hazardous decomposition. Keep containers dry and tightly closed to avoid moisture absorption and contamination. Keep container away from flammable and explosive substances. Protect from heat and exposure to direct sunlight Store in original container.
Transport and store container in upright position only. Residual vapors might explode on ignition; do not apply heat, cut, drill, grind or weld on or near this container.
Consult NFPA 400 for storage area guidance. Storage and handling designs should be arranged in consultation with a person experienced in these types of assessments.

**Further information**
STORE BELOW 10 °C (50 °F)
Do not return residues to original container.

**Advice on common storage**
Do not store together with:
acids, alkalis, reducing agents, metallic salts.

**Storage stability**
< 10 °C

---

### 8. Exposure controls/personal protection

#### 8.1. Control parameters

**Other information**
Contents no substances with occupational exposure limit values.

#### 8.2. Exposure controls

**Engineering measures**
Use process enclosures, local exhaust ventilation or other engineering controls to control airborne exposure.

#### 8.3. Personal protective equipment

**Respiratory protection**
A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.

**Hand protection**
Personal protective equipment that provides a barrier to prevent dermal exposure to this substance is required.
Use impermeable gloves.
Suitability for specific workplaces should be clarified with protective glove manufacturers.
Gloves must be inspected prior to use.
Glove material butyl rubber
Material thickness 0.5 mm
Break through time > 8 hrs
The above mentioned hand protection is based on knowledge of the chemistry and anticipated uses of this product but it may not be appropriate for all workplaces. A hazard assessment should be conducted prior to use to ensure suitability of gloves for specific work environments and processes prior to use.

**Eye protection**
Use chemical splash goggles or face shield.

**Skin and body protection**
A safety shower and eye wash fountain should be readily available.
To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132) be conducted before using this product.
Hygiene measures
Remove and wash contaminated clothing before re-use.
Wash thoroughly after handling.
Keep away from food, drink and animal feedingstuffs.
All protective equipment that has been contaminated should be cleaned before reuse.

9. Physical and chemical properties

9.2. **Other information**
peroxides  The substance or mixture is an organic peroxide classified as type D.

10. **Stability and reactivity**

10.1. **Reactivity**
Stable under recommended storage conditions.

10.2. **Chemical stability**
Contact with incompatible substances can cause disintegration at or below SADT.

10.3. **Possibility of hazardous reactions**

- **Stability**
  Product will not undergo hazardous polymerization.

- **Possibility of hazardous reactions**
  When coming in contact with the product, impurities, decomposition catalysts, metallic salts, alkalis, reducing agents may lead to self-accelerated, exothermic decomposition and the formation of oxygen compounds.
  Risk of decomposition when exposed to heat.

10.4. **Conditions to avoid**
Keep away from heat and sources of ignition.

10.5. **Incompatible materials**
Heavy metal compounds, reducing agents, Combustible material, Strong acids and strong bases, Oxidizing agents, impurities, metal ions, metallic salts, metals.

10.6. **Hazardous decomposition products**
Temperatures at or above the SADT can result in the release of hazardous decomposition products which are flammable and can autoignite.. In case of fire and decomposition formation of inflammable and explosive, irritant, corrosive, harmful and toxic gases and vapors possible.

Contact with incompatible materials or exposure to temperatures exceeding the SADT may result in a self acceleration decomposition reaction with release of flammable vapors which may autoignite.

11. **Toxicological information**

11.1. **Information on toxicological effects**

- **carcinogenicity assessment**
  Contains no carcinogenic substances as defined by NTP, IARC and/or OSHA.

**Toxicological information on components**

- **tert-Amyl peroxy-2-ethylhexanoate**
  - **Acute oral toxicity**
    LD50 Oral Rat: > 5000 mg/kg
  - **Acute inhalation toxicity**
    LC50 Rat(male/female): 42.2 mg/l / 4 h / vapour
  - **Acute dermal toxicity**
    LD50 Dermal Rabbit: > 2000 mg/kg
  - **Skin irritation**
    No skin irritation

**12. Ecological information**

**12.1. Toxicity**

**Toxicity to fish**  
no data available

**12.2. Persistence and degradability**

**Biodegradability**  
No data available

**12.3. Bioaccumulative potential**

**Bioaccumulation**  
no data available

**12.4. Mobility in soil**

**Mobility**  
No data available
12.5. Other adverse effects

Further Information: No data available

13. Disposal considerations

13.1. Waste treatment methods

**Product**

Waste must be disposed of in accordance with federal, state and local regulations. Incineration is the preferred method of disposal. Before incineration, liquid organic peroxides should be diluted with No. 2 fuel oil or other suitable hydrocarbon diluent. Contact United Initiators at 1-440-323-3112 for additional information. Empty containers must be handled with care due to product residue. DO NOT HEAT OR CUT THE EMPTY CONTAINER WITH ELECTRIC OR GAS TORCH.

**Product**

RCRA Classification Reactive D003.
RCRA Classification Ignitable D001.

**Uncleaned packaging**

Packaging material should be recycled or disposed of in accordance with federal, state and local regulations.

14. Transport information

**D.O.T. Road/Rail**

14.1. UN number: UN 3115
14.2. UN proper shipping name: Organic peroxide type D, liquid, temperature controlled (tert-Amyl peroxy-2-ethylhexanoate, 75%)
14.3. Transport hazard class(es): 5.2
14.4. Packing group: II
14.5. Environmental hazards (Marine pollutant): --
14.6. Special precautions for user:

Temperature-controlled transport.

Control temperature: 20 °C
Emergency temperature: 25 °C

**Air transport ICAO-TI/IATA-DGR**

14.1. UN number: UN 3115
14.2. UN proper shipping name: Organic peroxide type D, liquid, temperature controlled
14.3. Transport hazard class(es): 5.2
14.4. Packing group: --
14.5. Environmental hazards: --
14.6. Special precautions for user: Yes
IATA-C: Transport prohibited.
IATA-P: Transport prohibited.
Temperature-controlled transport.

Sea transport IMDG-Code/GGVSee (Germany)
14.1. UN number: UN 3115
14.2. UN proper shipping name: ORGANIC PEROXIDE TYPE D, LIQUID, TEMPERATURE CONTROLLED(tert-Amyl peroxy-2-ethylhexanoate, 75%)
14.3. Transport hazard class(es): 5.2
14.4. Packing group: --
14.5. Environmental hazards (Marine pollutant): --
14.6. Special precautions for user: Yes
   EmS: F-F, S-R
   "Separated from" acids and alkalis.
   Protected from sources of heat.
   Temperature-controlled transport.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: 
for transport approval see regulatory information.

15. Regulatory information

US Federal Regulations

OSHA
If listed below, chemical specific standards apply to the product or components:

- None listed

Clean Air Act Section (112)
If listed below, components present at or above the de minimus level are hazardous air pollutants:

- None listed

CERCLA Reportable Quantities
If listed below, a reportable quantity (RQ) applies to the product based on the percent of the named component:

- None listed

SARA Title III Section 311/312 Hazard Categories
The product meets the criteria only for the listed hazard classes:

- Acute Health Hazard
- Fire Hazard
- Reactivity Hazard

SARA Title III Section 313 Reportable Substances
If listed below, components are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

- None listed
Toxic Substances Control Act (TSCA)
If listed below, non-proprietary substances are subject to export notification under Section 12 (b) of TSCA:

- None listed

State Regulations

California Proposition 65
A warning under the California Drinking Water Act is required only if listed below:

- None listed

International Chemical Inventory Status
Unless otherwise noted, this product is in compliance with the inventory listing of the countries shown below. For information on listing for countries not shown, contact the Product Regulatory Services Department.

- Europe (EINECS/ELINCS) listed/registered
- USA (TSCA) listed/registered
- Canada (DSL) listed/registered
- Australia (AICS) listed/registered
- Japan (MITI) listed/registered
- Philippines (PICCS) listed/registered
- China listed/registered
- Korea listed/registered
- New Zealand listed/registered

An employer using HMIS/NFPA labeling must through training ensure that its employees are fully aware of the hazards of the chemicals used.
